Zafer Siar Konyar

BSc Computer Science student

I am a highly motivated and dedicated final year student with a strong commitment to my personal and professional goals. With strong communication skills, I contribute effectively both independently and within team environments.

EXPERIENCE

Mobile App Developer

Mirako   Apr 2025 – Sep 2025 (5 Months)   Istanbul, Turkey

Skills: *React Native (Expo), TypeScript, JavaScript, monorepo development, EAS, iOS release management*

- Built and maintained Expo-based mobile apps within a monorepo structure
- Managed shared dependencies and organized code across multiple projects
- Gained hands-on experience with Apple's development ecosystem (Developer Console & App Store Connect)
- Contributed to the full development lifecycle, including feature development and deployment

Paid Software Developer Intern

Erguvan   Apr 2024 – Sep 2024 (5 Months)   Istanbul, Turkey

Skills: *Next.js, Prisma, Tailwind CSS, TypeScript, T3 stack*

- Learned and used the T3 stack (Next.js, Prisma, Tailwind CSS, TypeScript) to work on a carbon/REC trading and data-driven carbon & ESG management website
- Contributed to feature development and overall project implementation

Logistics Assistant

IKRA Logistics   Sep 2023 – Present   London, United Kingdom

Skills: *time management, discipline, reliability, teamwork, adaptability, communication, responsibility*

- Currently working part-time during term (two days a week) at IKRA Logistics, entering import records and assisting staff with basic computer and system issues to cover my accommodation costs.

PROJECTS

Optimised Crypto Transaction Batching – Final Year Project
A decentralised application designed to reduce the carbon footprint of cryptocurrency transactions through efficient batching and scheduling. Demonstrates how blockchain activity can be made more environmentally sustainable.

Hercule – Mobile App
Live on: `herculewebsite.pages.dev`

A fitness tracking app I originally built for logging workouts, now evolving into a full-featured mobile fitness platform. Developed with Expo, React Native, TypeScript, and Firebase.

Gumruk Beyan Tara – Web App
Live on: `gumrukbeyantara.com`

A productivity tool that processes import declarations by splitting them into product items and generating concise summaries. Built to improve efficiency at IKRA Logistics and now actively used by employees.

Uni Night Out – Web App
Live on: `uninightout.vercel.app`

A platform developed with my friend to help university students easily organise and attend events. Built with Next.js and React.
